DETAILED ACTION

This is in response to amendment filed on 2/28/07 in which claims 1-18 are pending. The amendments have been fully considered therefore this case is in condition for allowance.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following recited features: defining, in each said expanded constellation, $p-1$ equivalent signal points for each signal point of the basic constellation, where each of the $p-1$ equivalent points is selected from redundant points in the opposite quadrant of the constellation to the corresponding point of the basic constellation; and generating the discrete multi-tone signal in a said sample period by selecting, for each of said N sub-channels, the modulation symbol representing either a basic constellation point or a corresponding equivalent point such that the peak value of the signal does not exceed a predetermined threshold as recited in all the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
